## About CoinMarketCap

**CoinMarketCap is the world's most-referenced price-tracking website for cryptoassets in the rapidly growing cryptocurrency space. Its mission is to make crypto discoverable and efficient globally by empowering retail users with unbiased, high quality and accurate information for drawing their own informed conclusions.**

Founded by Brandon Chez in May 2013, CoinMarketCap has quickly grown to become the most trusted source by users, institutions, and media for comparing thousands of cryptoassets and is commonly cited by CNBC, Bloomberg, and other major news outlets. (Even the U.S. government uses CoinMarketCap's data for research and reports!)

In April 2020, CoinMarketCap was acquired by Binance Capital Mgmt. Binance is the global blockchain company behind the world's largest digital asset exchange by trading volume and users, which shares the common vision of making crypto accessible and systemically important to people all around the world.

Through the acquisition, CoinMarketCap plans to tap into its parent company's extensive resources to acquire more in-depth data into projects, reduce information asymmetry in the crypto industry and bring higher-quality data to its hundreds of millions of users.

CoinMarketCap stands firmly for accurate, timely and unbiased information. Since its acquisition by Binance in early 2020, CoinMarketCap continues to operate independently from its parent company. Read our [disclosure policy](#) for more information.

For job openings at CoinMarketCap, check out our [careers page](#).

## Disclosure Policy

In April 2020, CoinMarketCap was acquired by Binance Capital Mgmt. There is no ownership relationship between CoinMarketCap and Binance.com.

Binance is the global blockchain company behind the world's largest digital asset exchange by trading volume and users, serving a greater mission to accelerate cryptocurrency adoption with 25+ products, projects and initiatives. Binance.com is known for offering a wide range of cryptoasset trading options and fiat on-ramps for multiple currencies globally, as part of its mission to increase the freedom of money.

Following this acquisition, CoinMarketCap will continue to be run as an independent business entity and stays committed to providing the most accurate, timely and quality cryptocurrency data in the industry. CoinMarketCap strictly follows and enforces its independent [listing criteria guidelines](#), circulating [supply calculation methods](#) and [liquidity score](#) for how it ranks cryptoassets.

While the Binance cryptocurrency exchange and its native token BNB are listed on CoinMarketCap, CoinMarketCap and Binance are separate entities that maintain a strict policy of independence from one another: Binance has no bearing on CoinMarketCap rankings, while CoinMarketCap has no influence over Binance's operations.

No Binance employee, including CZ, has control over CoinMarketCap's ranking algorithms or listing processes. Cryptoassets that wish to be listed on CoinMarketCap should follow the guidelines in our [listing policy](#) and will be fairly and independently evaluated on their merits.

CoinMarketCap's official [ranking criteria](#) is designed to eliminate any possibility of preferential treatment in general, even for the Binance exchange or BNB cryptoasset. This will be enforced in spite of any positive or negative financial effect this adherence to policy might have for its parent company.

CoinMarketCap and its employees do not take any public positions on the economic merits of any cryptoasset, nor do they publicly endorse any cryptoasset or blockchain project. All cryptoasset and/or project endorsements from CZ and/or Binance are unrelated to the CoinMarketCap brand and operations.

CoinMarketCap will continue to present the most accurate data on cryptocurrencies to the wider public independently. We are confident that our common vision to further the crypto revolution and promote transparency in the crypto space will be strengthened by this acquisition.

# Ranking (Market Pair, Cryptoasset, Exchange)

Jay

20 days ago · Updated

[Follow](#)

## Market Pair Rank

Volume inflation has been a problem that CoinMarketCap has been actively addressing since 2018. We have noted that some of the exchanges listed on CoinMarketCap have reported inflated trading volumes to give the impression of legitimacy and a false sense of liquidity in markets. This has, in the past, contributed to eroding confidence in the cryptocurrency industry and has, at times, misled both investors and traders.

CoinMarketCap realizes the severity of the situation and has worked tirelessly on a comprehensive and algorithmic solution to the problem, as is our standard practice. After extensive research and crunching reams of data, we identified two main drivers of volumes — liquidity of markets, and the number of traders on the exchange. In general terms, within a retail-driven crypto trading market, it is difficult to have high volumes without (i) a large number of traders and (ii) liquid markets.

With modifications to our Market Pair Ranking algorithm and introduction of the Confidence indicator, we strive to achieve two main objectives:

- **Rank market pairs of all cryptoassets using a combination of Reported Volume, Liquidity Score and Web Traffic Factor.**
- **Highlight the confidence level we have that the exchange's Reported Volume is accurate.**

Market pair ranking will be done by taking the key variables of Reported Volume, Liquidity Score and Web Traffic into consideration. The algorithm takes all these factors as inputs into a machine learning model, and automatically ranks market pairs based on the dynamic weights attributed to each of these criteria. The top market pairs for each cryptocurrency will be those that have the highest relative Reported Volume, Liquidity Score and Web Traffic, instead of simply being weighted on Reported Volume alone. This triage of factors, fairly calculated by an automated machine learning algorithm, is expected to provide a more comprehensive picture of each market pair, ensuring that users make better decisions on where to trade.

## Cryptoasset Rank

Due to the launch of the [CoinMarketCap indices](#) (administered by Solactive, which is fully compliant with IOSCO Principles for Financial Benchmarks), a project's eligibility for a Top 200 Cryptoasset Rank will now be determined by [market capitalization](#) and the following factors:

1. Our ability to verify the project's supply information with no incongruities
2. Strengths in a number of areas of Listings Review Criteria's [Section C \(Evaluation Framework\)](#) below
3. Significant liquidity/trading activity with normal bid-ask spreads across sufficient sources of market data
4. Absence of significant price discrepancies across CMC-supported exchanges
5. The asset is traded on at least three non-decentralized exchanges that possess a number of the following attributes:
  - Publishes granular API endpoints
  - Active product development and communication from the team
  - Active/engaged community of a considerable size
  - Accredited/Audited by a credible 3rd party
  - DATA Partner
  - Regulated/Licensed

The aforementioned factors are intended to provide some ***degree of transparency*** and **general guidance** without disclosing internal thresholds so as to prevent projects from 'gaming' or manipulating the rankings.

- To use an analogy, we have shared the ingredients but not the recipe/secret sauce because the latter is proprietary and a trade secret.
- Consider how [search engines typically publish general guidelines](#) on how their algorithms work without being too specific.

Further, the sheer variety of monetary and accounting models used by projects adds complexity to the process of verification, which means that there will be occasions where CoinMarketCap will have

to exercise its discretion in determining a project's circulating supply and/or eligibility for a Top 200 ranking (e.g. stablecoins, privacy coins, sidechains, and exchange tokens). Consequently, maximum rank eligibility of a project will fall under one of three categories:

6. **Top 200 Rank:** The project must minimally have a **CMC-verified** market capitalization **and** fulfill the requirements outlined in (1) - (5) above.
7. **Top 201 Rank and beyond:** The project must minimally have a **CMC-verified** market capitalization **but** does not need to fulfill the requirements in (1) - (5) above.
8. **Unranked:** Cryptoassets without a **CMC-verified** market capitalization sorted by 24h trading volume.

## Exchange Rank

**CoinMarketCap ranks exchanges by their top spot market pairs' rankings and spot market pairs' Confidence score.** Highly-ranked exchanges will have markets that score well across Liquidity Scores, Volume, and Web Traffic Factor and have high Confidence scores.

As stated [here](#), a machine learning algorithm takes the factors of Reported Volume, Liquidity Score and Web Traffic as input when ranking market pairs. This triage of factors, fairly calculated by an automated machine learning algorithm, is expected to provide a more comprehensive picture of each market pair, ensuring that users make better decisions on where to trade. We utilize the Confidence of the respective market pairs in our Exchange Ranking algorithm to adjust the weight of market pairs where Confidence is low.

Exchanges will then be ranked by their respective top market pairs and the Confidence score attributed to them.

# Listings Criteria

Jay

2 months ago · Updated

Follow

*It's come to our attention that projects have been receiving phishing emails from multiple email addresses such as [team@coinmarketcap.com](mailto:team@coinmarketcap.com). These are NOT emails created by CoinMarketCap, but by an entity with the intent of scamming companies and individuals. We don't reach out to projects, nor do we ask for payment on listings, period. Companies may want to verify the authenticity of a message here: <https://t.me/CoinMarketCap>. Please note that the [online submission form](#) is the **ONLY** way to request for listings/updates to CoinMarketCap.*

## DATA ADMISSIBILITY GUIDELINES

Determining which requests to prioritize/process is a balancing act as information may vary across different sources. Consequently, we rely on 3 principles to guide our decision-making process:

1. Credibility: Is the requester able to substantiate his/her case with supporting evidence?
2. Verification: Are we able to verify the information from credible and independently verifiable sources?
3. Methodology: Is this request in accordance with our methodology?

The most common types of requests that CoinMarketCap receives are as follows:

S/N	Request Type	Best Practices
1	Updating of project details/URLs	<ul style="list-style-type: none"> <li>• Please ensure that the requested updates match what is found on the project's website/social media accounts.</li> <li>• If the request entails changing the project's website, please explain why the team is unable to get the original URL to redirect to the new website.</li> <li>• The verification process will be delayed if we observe any incongruities.</li> </ul>
2	Name change/Rebrand	<ul style="list-style-type: none"> <li>• Ensure that the majority of CMC-supported exchanges have already processed the name change before reaching out.</li> </ul>
3	Add markets/pairs for CMC-supported exchanges/assets	<ul style="list-style-type: none"> <li>• Ensure that the asset and exchange are <b>tracked listings</b> on CMC (See <a href="#">Section B. 3.</a> below).</li> <li>• Ensure that there is non-trivial trading activity/volume.</li> <li>• Provide <b>direct URLs</b> to the specific pairs/assets.</li> <li>• Include the full name of the asset to minimize confusion.</li> <li>• We will <b>not</b> add markets that have trivial volume/activity.</li> </ul>
4	Project listings	<ul style="list-style-type: none"> <li>• Review Sections (A) - (E) below.</li> </ul>
5	Supply Updates	<ul style="list-style-type: none"> <li>• Provide detailed and well-structured documentation on the asset's distribution.</li> <li>• The verification process will be delayed if we observe any incongruities.</li> </ul>
6	Complaints about misconduct	<ul style="list-style-type: none"> <li>• Provide a detailed and specific account of the incident.</li> <li>• Furnish proof from <a href="#">credible and independently verifiable resources</a>.</li> </ul>
7	Requests to delist 'scam' cryptoasset projects	<ul style="list-style-type: none"> <li>• Self-selected screenshots and/or social media/forum posts are hard to verify because they can be doctored or orchestrated via sybil attacks.</li> <li>• The challenges of drawing the right conclusions are explained in <a href="#">this blog post</a>.</li> </ul>

**S/N**

## Request Type

## Best Practices

8

Requests to exclude  
'scam' exchanges that  
are distorting prices

- Our approach is to remain neutral and avoid censorship by providing as much information as possible to our users so that they can form their own conclusions. As such, we generally rely on factual alerts (rather than censorship) when we are able to verify the complaint from credible sources (e.g. regulator statements/watchlists about fraudulent activity or a mea culpa from the accused).

On a daily basis, CoinMarketCap receives thousands of requests to add specific cryptoassets and exchanges to the website. In an ideal world, we would be able to entertain most of these requests, but the reality is that due to finite resources, we must prioritize listings based on set criteria and guidelines.

## (SECTION A) Application Tips

1. Please review Sections A - E before submitting an application.
2. Requests that provide **complete and well-structured information (with evidence) will be prioritized for review.**
3. Check and ensure that you submit your application to the correct option on the form. For example, new exchange applications must be submitted to the 'Add new exchange' option on the form, and not anywhere else. Applications that are submitted to the wrong option(s) on the form will be discarded.
4. Take the time to consolidate your points in a separate document before completing the form.
5. Avoid piecemeal submissions.
6. Substantiate your points with evidence from credible, independently verifiable sources.
7. Quantify and qualify your progress with concrete and specific examples.
8. Avoid hyperbole and vague statements.
9. Organize and structure your points in a coherent and logical manner.
10. Be truthful. False or misleading claims may render your submission inadmissible.

## (SECTION B) Minimum Requirements for 'Tracked Listings'

Note that these are just the **minimum requirements** and meeting them **does not guarantee** a listing.

### (1) Cryptoassets

For a cryptoasset to be **considered** for a tracked listing, it must meet the following prerequisites:

1. Leverage cryptography, consensus algorithms or distributed ledgers, peer-to-peer technology and/or smart contracts to function as a store of value, medium of exchange, unit of account, or decentralized application.
2. Must have a functional website and block explorer.
3. Must be traded publicly, and actively traded on at least one (1) exchange (with material volume) that has ***tracked listing*** status CoinMarketCap.
4. Provide a representative from the project with whom we can establish open lines of communication for any clarifications.

### (2) Exchanges

For an exchange to be **considered** for a tracked listing, it must meet the following prerequisites:

1. A functional website with trading volume that matches its API data.
2. Must publish a **summary** API endpoint that exposes the last price and 24h volume of each cryptoasset.
  1. [See sample of an ideal API endpoints](#). Exchanges must include a variable for 'type' of market to help us distinguish derivatives (e.g. perpetual swaps, options, physically-delivered futures) from spot markets.
3. Must be in operation for at least sixty days (The number of days that affiliated exchanges/projects of the **same name** have been in operation counts towards this requirement).
4. Must allow traders to place buy and sell orders on an orderbook. DEXes with no orderbook data will be evaluated on a case-by-case basis.
5. Must allow users to view all market pairs/order books without the need to log-in to the website.
6. Must have direct URLs that display **each** asset **unambiguously (full asset name and/or logo)**, preferably with a 'System Status' page that shows **all listed assets**.
7. Must be able to provide a representative from the exchange with whom we can establish open lines of communication for any clarifications.
8. Requests originating from emails that share the domain of the exchange will be prioritized.

### (3) Listing Tiers

Projects that do not meet the minimum requirements **may** still be featured on the site as **untracked listings**, as outlined in Item (3) below.

1. **Inactive Listing** - Projects that have been set to inactive status due to the absence of market data on at least one CMC-supported exchange or cessation of operations. To qualify for a reactivation review, the project must be able to demonstrate that the asset is actively traded with material volume on at least two CMC-supported exchanges.
2. **Unverified Listing** - Projects whose price data show up through automated processes, but have not been reviewed by CMC.
3. **Untracked Listing** - Projects that do not meet the minimum requirements in [Section B1/B2](#) to track market data, but nevertheless exhibit strengths in a number of areas of [Section C \(Evaluation Framework\)](#) below.
4. **Tracked Listing** - Projects that have met the minimum requirements in [Section B1/B2](#) and exhibit strengths in a number of areas of [Section C](#).

### (SECTION C) Evaluation Framework

Beyond the prerequisites, we perform our evaluation holistically and pay close attention to a multitude of factors (both quantitative and qualitative). Getting listed is therefore **not** simply a matter of ticking off a checklist or hitting predefined thresholds, as we benchmark submissions against others in the cohort. These factors include but are not limited to:

S/N	Factor	Description	Examples
1	Trading Volume & Market Pairs	Trading volume and liquidity help with establishing a market price for users to acquire and sell cryptoassets. We also pay close attention to the market pairs on supported exchanges and the sources of the volume.	<ul style="list-style-type: none"> <li>• <a href="https://coinmarketcap.com/currencies/bitcoin/">https://coinmarketcap.com/currencies/bitcoin/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/ethereum/">https://coinmarketcap.com/currencies/ethereum/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/tether/">https://coinmarketcap.com/currencies/tether/</a></li> </ul>
2	Community Interest & Engagement	A project's usefulness is largely a function of adoption and its ability to foster meaningful	<ul style="list-style-type: none"> <li>• <a href="https://coinmarketcap.com/currencies/verge/">https://coinmarketcap.com/currencies/verge/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/tron/">https://coinmarketcap.com/currencies/tron/</a></li> </ul>

S/N	Factor	Description	Examples
		interactions with its community and user base.	<ul style="list-style-type: none"> <li><a href="https://coinmarketcap.com/currencies/binance-coin/">https://coinmarketcap.com/currencies/binance-coin/</a></li> </ul>
3	Traction/Progress	This can take the form of user growth, partnerships, institutional/consumer adoption, and roadmap progress	<ul style="list-style-type: none"> <li><a href="https://coinmarketcap.com/currencies/ripple/">https://coinmarketcap.com/currencies/ripple/</a></li> <li><a href="https://coinmarketcap.com/currencies/crypto-com/">https://coinmarketcap.com/currencies/crypto-com/</a></li> <li><a href="https://coinmarketcap.com/currencies/vechain/">https://coinmarketcap.com/currencies/vechain/</a></li> </ul>
4	Team	The personnel, investors, and advisors are integral to the success of any given project, especially if there are transferable skills/experience/networks that can be leveraged. The conduct of the team (e.g. transparency and professionalism) will also factor into our assessment.	<ul style="list-style-type: none"> <li><a href="https://coinmarketcap.com/currencies/theta/">https://coinmarketcap.com/currencies/theta/</a></li> <li><a href="https://coinmarketcap.com/currencies/unus-sed-leo/">https://coinmarketcap.com/currencies/unus-sed-leo/</a></li> <li><a href="https://coinmarketcap.com/currencies/ontology/">https://coinmarketcap.com/currencies/ontology/</a></li> </ul>
5	Product/Market Fit	A project with a minimum viable product that addresses a specific pain point, problem, or use case is more likely to gain traction in the long run.	<ul style="list-style-type: none"> <li><a href="https://coinmarketcap.com/currencies/basic-attention-token/">https://coinmarketcap.com/currencies/basic-attention-token/</a></li> <li><a href="https://coinmarketcap.com/currencies/binance-coin/">https://coinmarketcap.com/currencies/binance-coin/</a></li> <li><a href="https://coinmarketcap.com/currencies/eos/">https://coinmarketcap.com/currencies/eos/</a></li> </ul>
6	Impact & Practicality	Some of the most transformative ideas (such as livestreaming and eCommerce circa 1996) failed initially because they were ahead of their time. By that very token (pun intended), it is critical that a project be easy to implement and	<ul style="list-style-type: none"> <li><a href="https://coinmarketcap.com/currencies/basic-attention-token/">https://coinmarketcap.com/currencies/basic-attention-token/</a></li> <li><a href="https://coinmarketcap.com/currencies/stellar/">https://coinmarketcap.com/currencies/stellar/</a></li> <li><a href="https://coinmarketcap.com/currencies/ripple/">https://coinmarketcap.com/currencies/ripple/</a></li> </ul>

S/N	Factor	Description	Examples
7	Uniqueness & Innovation	use for a sizeable addressable market. Creating a project with unique and interesting characteristics/technology expands the use cases for crypto and helps the crypto ecosystem grow as a whole.	<ul style="list-style-type: none"> <li>• <a href="https://coinmarketcap.com/currencies/chainlink/">https://coinmarketcap.com/currencies/chainlink/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/cosmos/">https://coinmarketcap.com/currencies/cosmos/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/aragon/">https://coinmarketcap.com/currencies/aragon/</a></li> </ul>
8	Project Longevity & Activity	Many projects come and go. For this reason, we prefer to list projects that have stood the test of time.	<ul style="list-style-type: none"> <li>• <a href="https://coinmarketcap.com/currencies/bitcoin/">https://coinmarketcap.com/currencies/bitcoin/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/ethereum/">https://coinmarketcap.com/currencies/ethereum/</a></li> <li>• <a href="https://coinmarketcap.com/currencies/litecoin/">https://coinmarketcap.com/currencies/litecoin/</a></li> </ul>

## (SECTION D) House Rules

1. The [online submission form](#) is the **ONLY** way to request for listings/updates to CoinMarketCap.
2. **DO NOT** reach out through other channels, such as email or social media, because you will always be directed to this form.
3. **DO NOT** submit duplicate requests or repeatedly ask for status updates as it will add to the queue and delay the process.
4. **DO NOT** contact our team members on any other channel, as this will not help in getting your request expedited.
5. **DO NOT** 'spam' the request form (or incite other entities into doing so on your behalf) as this may result in the blacklisting of your project.
6. **DO NOT** send "angry comments" to our official email channels or social media as this does not reflect well on your organization and may result in the blacklisting of your project.
7. If your project is not listed right away, you may send us additional information about your progress (consolidated with all the information from previous submissions as a new request on the online submission form) to keep us updated, especially if the project has made **significant** progress.
8. **CoinMarketCap listings are always free.** Please beware of spoofed emails, fake social accounts, or individuals requesting listing fees. Anyone asking you to pay a fee or tip for getting your project listed on CoinMarketCap is definitely not sanctioned to do so. We also do not sanction any listing service to assist in the listing application of any cryptoasset project or

exchange. While we gladly accept donations, attempting to bribe us in the hopes of influencing the outcome of your request will not work.

9. CoinMarketCap **DOES NOT** accept payment of any form to bypass listing requirements or to intentionally publish inaccurate information. We evaluate every request with the same level of scrutiny.
10. Offering to pay large sums for advertising, contingent upon the outcome of your listing, will also not improve your chances of getting listed.
11. Focus on organic growth and use of your project. Inflating your project's trading volume, traffic, or social media metrics will not increase your chances of getting listed.
12. It is in every project's interest to provide accurate and well-documented information in good faith.
13. Projects that attempt to manipulate or artificially inflate their figures will be **permanently disqualified** from the rankings.

## (SECTION E) Delisting Policy

CoinMarketCap reserves the right to exercise its sole discretion in delisting a market/pair, exchange, or cryptoasset without prior notice. Factors that **could** contribute to such a course of action **may** include the following:

1. Low liquidity or suspicious trading activity.
2. The project's cessation of development and/or business activity.
3. The project's listing on CMC was the result of misleading, incomplete, or false information.
4. The project (and/or its associates) is under investigation, on regulator watchlists, or is found guilty of a breach of law(s), statute(s), and regulation(s).
5. Extraordinarily poor implementation or reception by the project's community.
6. Any other factor that CoinMarketCap deems risky for its users.
